Letter of Intent

Department of Education

Region III

Schools Division of Pampanga

September 5, 2025

On behalf of RA WAY Beverages "Honey Water" Company, I am writing to express our **Letter Of Intent** to supply your School with our latest product. We believe that our Honey Water would be a great addition to your inventory and that your students and teachers will appreciate the natural and health benefits our product offers.

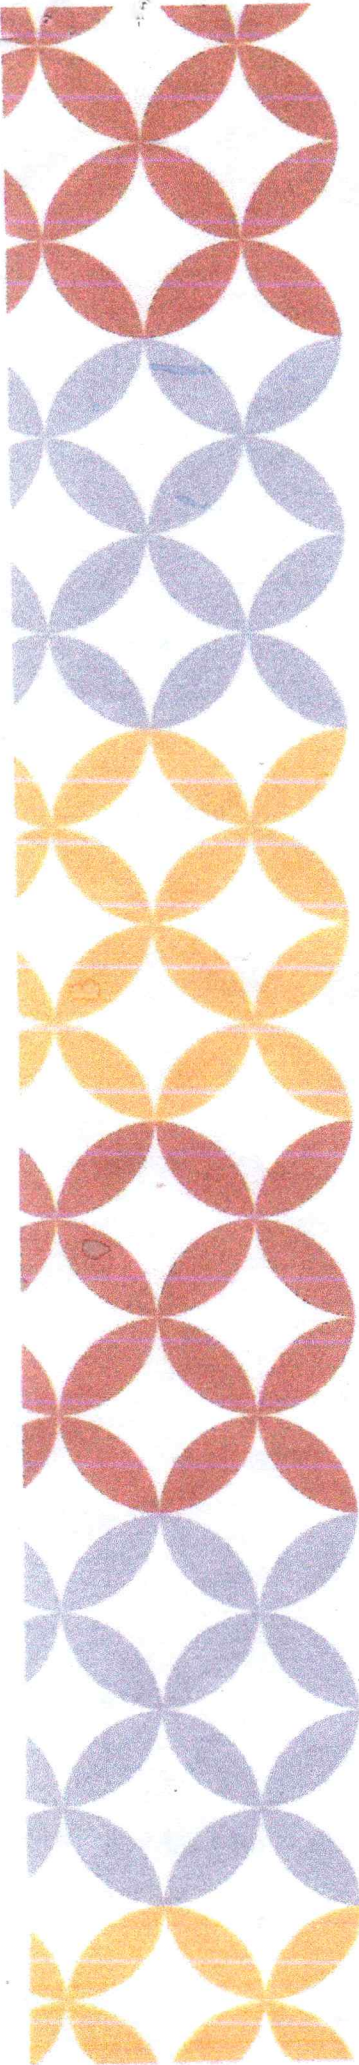

As you may know, our Honey Water is an all natural beverage that is made from fresh fruits, vegetables, minerals, and honey. This combination of natural ingredients creates a drink that enhances your immune system, supports your digestive system, reduces inflammation, lowers cholesterol and can potentially prevent chronic diseases. Our four flavors - lemon, calamansi, ginger and Ice Tea are formulated to cater to different tastes while maintaining the same benefits.

We will be pleased to provide your school with the option to purchase our Honey Water in bulk, at a wholesale rate in which you will find to be **very (Affordable)** to your students and teachers. As we share the same values of providing **high-quality, healthy** products to students and teachers, we want to ensure convenience, accessibility and affordable pricing for our partners.

We are happy to work with you to schedule a delivery plan that suits the needs of your school. We offer competitive pricing and flexible payment options to accommodate your school requirements.

Thank you for considering our request and we hope to work with you soon. If you require additional information about our Honey Water, please don't hesitate to contact us.

CEO. Ragib Muhammad

INTRODUCING RA WAY HONEY WATER

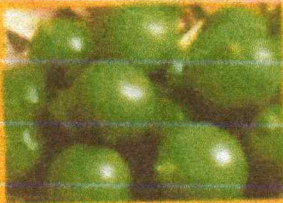

Lemon, calamansi, and ginger flavors in honey are flavors that have many health advantages. Your health can be enhanced by combining them into a single beverage. Your digestive system will be supported by routine consumption of lemon honey water, a fantastic health tonic. Drinking calamansi water with honey increases the production of bile and stomach acid. Vitamin C, which helps the immune system, it is abundant in calamansi honey. Lowered cholesterol, reduced inflammation, and a lower risk of developing chronic diseases. A fantastic technique to calm an upset stomach or treat other digestive-related concerns like bloating is to drink honey water with ginger taste. Ginger and honey can help the digestive tract and most of all it's sugar free, it's naturally and pure made of Honey with three different flavor, therefore that's what you should drink.

RAWAY

"HÖNEY"

Water

BEVERAGES

Calamansi flavor;

When honey is dissolved from water, it helps indigestion (acidic or upset stomach) by easing the passage food. Packed with vitamin C and other beneficial nutrients, Calamansi Juice has been used as an immune booster for generations.

Ginger Flavor ;

Ginger is related to another health powerhouse- turmeric, and has long history of use in both traditional and alternative medicine. Ginger aids digestion, kick starts your metabolism and is an effective detoxifier. Additionally, its anti-inflammatory properties help fight off the flu and common colds.

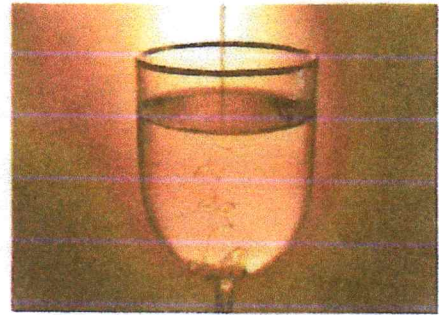

Lemon Flavor ;

When honey is dissolved from water, it helps indigestion (acidic or upset stomach) by easing the passage food. Lemon is packed with anti-inflammatory properties that can cure a host of health issues. Drinking lemon water daily will help fight respiratory.

Healthy Drinks with flavors

HONEY WATER

It's believed that people began gathering honey as early as 8,000 years ago. Honeybee products have been used for their health advantages since antiquity. It was employed as an embalming agent, a natural sweetener, and even as a cure. Your health can be enhanced by combining them into a single beverage.

What happens when we mix it with one of the best honeybee products in the planet? Here are some things that honey water can do for your body.

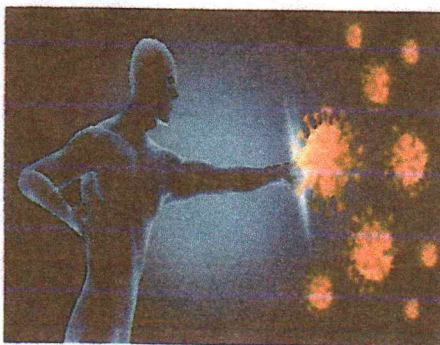

- A cure for cold

Do you frequently get sick, and the sore throat symptom is the one that bothers you the most? Honey's anti-inflammatory and antibacterial characteristics will aid in your speedy and painless recovery from a cold.

- Neutralizing bloatedness and gas

These uncomfortable feelings can be treated with a combination of water and honey: Warm water helps to neutralize gas, while honey has a proven diuretic effect. Together, they can treat practically any stomach discomfort you might occasionally experience. It has the ability to flush out toxins from your body, improves metabolism and makes you feel healthy.

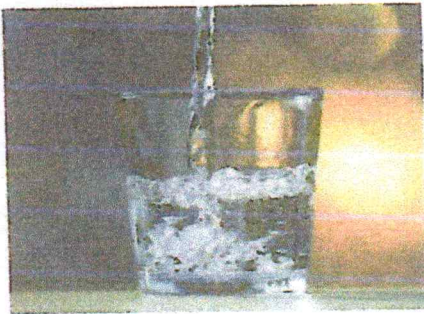

- Enhancing immunological function.

You don't need to be ill to take advantage of the nourishing, calming effects of honey and water. A daily cup will keep you energized and the bad bacteria at bay, enabling you to be ready for any challenges that may come your way.

If compared to conventional or pasteurized honey, raw honey may be healthier for a person's health, however there are no conclusive studies to support this claim. The components of raw honey, such as pollen and bee propolis, have been linked to a number of potential health benefits, according to researchers. Antioxidants and other useful components in honey may be damaged or destroyed during pasteurization. Pasteurization can smooth out honey and improve its aesthetic appeal, but it can also lessen the health advantages of honey. For those who use honey for medicinal purposes, raw honey can be a superior option because it retains all of its natural components without any processing.

MINERAL WATER

Mineral water comes from underground reservoirs. Unlike regular drinking water, mineral water does not undergo chemical processing. As the name suggests, mineral water contains high quantities of minerals, especially magnesium, calcium, and sodium.

•BENEFITS•

Natural mineral water may have certain health advantages because of the distinctive combination of minerals and organic compounds in it.

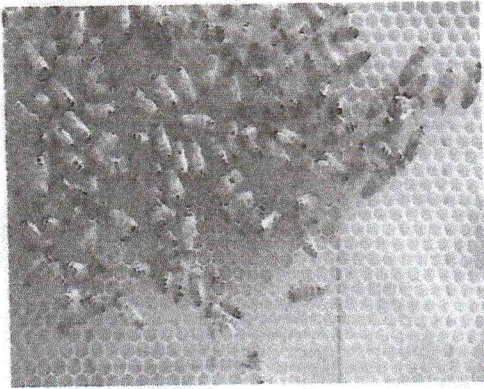

At all stages of life, adequate calcium consumption is crucial for bone health because it promotes bone growth and maintenance. Calcium has been found to be well-presented in mineral water. The body can actually absorb calcium from mineral water, according to studies.

According to a new study, drinking water rich in magnesium and calcium lowers blood pressure levels dramatically. Drinking mineral water can be a good source of both of these nutrients, therefore doing so may help lower blood pressure, especially in those who already have excessive levels.

Vital minerals that support the health of bones and the digestive system can be found in natural mineral water. More long-term research are required, but it is possible that this type of water can also lower blood pressure and enhance heart health.

RAW HONEY

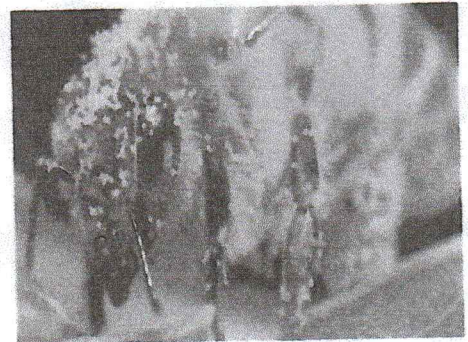

What is raw honey? The simplest way to describe raw honey is as honey "as it exists in the beehive". It is created by removing honey from the hive's honeycombs and pouring it over a mesh or nylon cloth to filter out contaminants like beeswax and dead insects. Studies have revealed that raw honey contains a number of healthy components. Certain elements in raw honey can be beneficial to health.

• BENEFITS •

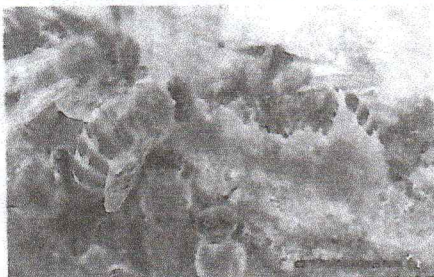

What are the ingredients of raw honey? These ingredients are covered in the following sections.

benefits of bee pollen claim the following:

- *antidiabetic qualities*
- *inflammatory effects prevention*
- *activity against germs and fungi*
- *alleviating characteristics*

These qualities make bee pollen a **valuable** addition to honey and can help honey achieve its inherent capacity to treat wounds and **eradicate** infections. Amino acids, vitamins A and C, and trace levels of calcium, magnesium, and sodium are also present in bee pollen.

Benefits of bee propolis claim the following:

- *reduction of inflammation*
- *action that fights cancer and ulcers*
- *impacts on fungi*

B vitamins, C and E vitamins, **magnesium**, **potassium**, and helpful enzymes are also present in bee propolis.
